

MEDIA VOICE OVER PROJECT SCRIPT

Starts off with me inputting the link for my website into google.

NARRATOR (V.O)

I am going to show you the website I have made for our second media level 2 assignment which is made for a film of our choice, I have chosen Detective Pikachu

I start by clicking on all of the button on the website to show off the different pages and where the navigation menu is and what it offers.

NARRATOR (V.O)

This is the website that I have designed. This is the navigation menu which lets you use these buttons to go to different places on the website.

I go back to the homepage and start scrolling and interacting with the different part of the page.

NARRATOR (V.O)

I will talk about the different parts of the homepage and how you can use it to access social media and trailers for the movie.

After looking at all of the different parts of the homepage I would then move on to the meet the Pokemon page

NARRATOR (V.O)

This is the meet the Pokemon page and on it you can see the Pokemon who are shown in the movie and a little bit about them such as their type and general information.

Then I would move on to the next page which would be reviews from well known review websites such as rotten tomatoes or imdb, this will include links for the pages that have the reviews as well.

NARRATOR (V.O)

This is the review page which shows off what some popular review websites thought about the movie which could help you decide whether or not you

want to watch the movie, if you click on one of the reviews it will take you to the website that the review is from.

I would then move onto the last page which would be information on that cast and crew of the film and their role in the production.

NARRATOR (V.O)

This is the final page of the website and it shows off the cast and crew that helped make the movie and their roles in the movie.
